Two prominent mathematicians recently joined the Illinois faculty in newly-created endowed professorships:

Rui Loja Fernandes is the Lois M. Lackner Professor in Mathematics. He comes to Illinois from the Department of Mathematics at Instituto Superior Técnico, Lisbon, where he was Department Head. Fernandes's recent research on Poisson geometry, integrable systems and Lie theory has led to ground-breaking publications in *Inventiones Mathematicae* and the *Annals of Mathematics*.

Philippe Di Francesco is the Morris and Gertrude Fine Distinguished Professor of Mathematics. Previously he held a research position at the Institut de Physique Théorique du Commissariat à l’Energie Atomique in Saclay, France. He has published over 100 papers in enumerative and algebraic combinatorics, integrable models of statistical physics and, more broadly, physical mathematics.
Study at Illinois

PhD Program
• streamlined degree (early research, no language exam)
• 30 graduate courses offered each semester
• students come from state and private universities, and liberal arts colleges
• collaborative environment
• finish in 4-6 years (average=5.75 years)
• multiple career paths (research, teaching, industry)
• conference travel
• optional summer internships

MS Programs in
• Mathematics, Applied Mathematics, Teaching of Mathematics
• Actuarial Science

Financial Support for PhD Students
• Full tuition waiver
• Partial fee waiver
• Stipend of at least $19,542 for nine months
• Teaching assistant (TA) duties are moderate: 4 hours per week in the classroom plus support activities
• Fellowship and Research Assistant funding available for some continuing students
• Living costs are low in this university-centered city; a one-bedroom apartment rents for about $550–$700 per month
• Summer support for many students through teaching, internal and external research grants, and scientific and industrial internships

Intellectual Community
The Urbana–Champaign campus, with approximately 32,000 undergraduate and 10,000 graduate students, is a world leader in the physical sciences, mathematics, the biological sciences, agriculture, and engineering.

The Department of Mathematics has 72 full-time faculty members, 25 postdoctoral faculty members, and a number of visiting faculty members. The department is based in Altgeld Hall, a beautiful stone Romanesque building in the heart of campus.

The faculty and more than 160 PhD students make a vibrant and first-rate mathematical community, pursuing research and teaching at the highest levels. Our graduate students come from all parts of the U.S. and around the world. We support an active chapter of the Association for Women in Mathematics, and more than sixty of our PhD students are women.

Excellent Job Placement
Around 50% of our PhD graduates are awarded postdoctoral positions, 30% go to teaching-oriented institutions, and around 20% to industry, finance, national laboratories, and government agencies.

TA Training
• Pre-semester training
• Classroom observations and feedback
• TA peer mentoring
• Graduate College Certificate Programs

Grant-funded Research
Faculty hold around 80 research grants from the NSF, NSA, Simons Foundation, Navy, and Air Force. Many of these grants support graduate student research, including the NSF-funded Program for Interdisciplinary and Industrial Internships at Illinois (PI4) and the international network Geometric Structures and Representation Varieties (GEAR).

Diversity Commitment
We strongly encourage applications from qualified U.S. candidates in traditionally under-represented groups. Fellowship funding may be available. The department provides a supportive environment for our twenty URM graduate students, and the University of Illinois is a nationally recognized Sloan Foundation Center for Exemplary Mentoring.

For faculty research, online application forms, funding information, and more visit www.math.illinois.edu/GraduateProgram/

Experience Urbana–Champaign
Urbana–Champaign’s micro-urban community combines small town traffic with big city amenities such as national retailers and ethnic restaurants. Visit the Market at the Square—one of the largest and most diverse farmers’ markets in Illinois—shop at organic food co-ops, and enjoy internationally renowned music, dance, and theater at the Krannert Center for the Performing Arts. Or for easy weekend get-aways, Chicago is just 140 miles away, St. Louis 180 miles, and Indianapolis 120 miles.

Recreation
The area offers multiple opportunities for hiking, camping, mountain biking, canoeing, crosscountry skiing, and snowmobiling. Campus recreational centers feature indoor tracks and pools, a 34-foot climbing wall, and lots of court space.
